

PHOTOGRAPHY

Capture moments that move people.

Dive into shooting, research, and presenting to refine your unique vision as you learn the craft and language of image making. Here, you'll work with faculty who practice professionally, and you'll also have the support of your peers in the Photography Collective. You'll expand meaning-making to create effective, original works and will have access to professional gear and cutting-edge digital tools, as well as traditional techniques and historical processes.

You'll leave CCAD confident in your ideas, style, and your ability to market yourself to a client, an employer, or a competitive MFA program.
